🌟 Summary

Motivated and passionate front-end web developer and Python enthusiast with hands-on experience in building interactive web and AI-powered applications. Adept in HTML, CSS, JavaScript, and Python, with projects spanning to-do apps, AI personality tools, and typing testers. Currently pursuing a Bachelor of Science in Information Technology and actively building a public portfolio of real-world projects. Eager to contribute to a dynamic software engineering team.

📁 Projects

AgriLocal – Multi-Language Smart Farming Marketplace

React.js, Node.js, Express.js, Firebase, Web Speech API, Google Translate API

[Live Demo](#)

[GitHub](#)

A comprehensive platform connecting local farmers with consumers featuring multi-language support (Hindi, Marathi, English, Gujarati) and AI-powered voice assistant. Includes real-time voice-to-text product search, intelligent crop recommendations, weather-based farming suggestions, and secure payment gateway integration. Built with React.js frontend, Node.js backend, and Firebase real-time database with RESTful API architecture.

AI To-Do List – Intelligent Task Management with Voice Control

React.js, Node.js, OpenAI API, Web Speech API, MongoDB

[Live Demo](#)

[GitHub](#)

An advanced task management application with AI-powered features and voice recognition capabilities. Features include natural language task creation through voice commands, intelligent priority scheduling using machine learning algorithms, and productivity analytics dashboard. Built with React.js components, Node.js backend API, OpenAI integration for smart suggestions, and responsive PWA design.

AiMirror – AI Personality Reflection Tool

Python, Streamlit, OpenAI API, SpeechRecognition

[GitHub](#)

An advanced personality assessment tool leveraging AI, voice analysis, and facial recognition technologies. Features real-time emotion detection through webcam, voice pattern analysis for personality traits, and comprehensive personality reports with visualization charts. Built with Python, Streamlit for interactive UI, OpenAI's GPT models for psychological insights, and machine learning algorithms for behavioral pattern recognition.

TypeGenius – Advanced Typing Performance Analyzer

React.js, Node.js, Chart.js, Web Workers API

[GitHub](#)

A comprehensive typing performance analysis platform with advanced metrics and gamification elements. Features include real-time WPM/accuracy tracking, keystroke heatmap visualization, typing pattern analysis, and competitive leaderboards with detailed performance analytics. Built with React.js for dynamic UI updates, Web Workers for performance optimization, and local storage for progress persistence.

ANIME – Interactive UI/UX Showcase Platform

React.js, CSS3 Animations, GSAP, Framer Motion

[Live Demo](#)

[GitHub](#)

An immersive anime-themed web experience showcasing advanced frontend development techniques and creative UI/UX design. Features include parallax scrolling effects, interactive character animations, dynamic theme switching, and responsive grid layouts with smooth page transitions. Built with React.js components, GSAP animation library, and modern CSS features demonstrating mastery of contemporary web development practices.

Skills

Frontend Development: HTML, CSS, JavaScript, React.js

Backend Development: Node.js, Express.js, Python

Tools & Platforms: Git, GitHub, VS Code, Streamlit, Firebase, npm

APIs & Integration: REST APIs, GraphQL, OpenAI API, Google Translate API, Web Speech API

Creative Tools: CapCut, Adobe Premiere Pro, Adobe After Effects, Adobe Photoshop, Canva

Content Writing: Technical documentation, project READMEs, short-form scripts

Soft Skills: Communication, Creativity, Teamwork, Multitasking

Education

Vidyalankar School of Information Technology, Mumbai

Bachelor of Science in Information Technology

Expected Graduation: June 2026

Anjuman Islam College of Commerce and Arts, Kurla

HSC (12th – Commerce)

Daffodil English High School, Govandi

SSC (10th)

Accomplishments

- Awarded multiple intercollegiate certificates for front-end development projects
- Recognized in college tech competitions for UI/UX creativity and AI integration

Activities and Interests

- Passionate about blending creativity with code
- Created demo videos for AI tools and web apps using CapCut and Premiere Pro
- Writes GitHub README files and technical descriptions for all major projects
- Strives to balance technical depth with engaging presentation and storytelling
